SITE AND LANDSCAPE PLAN

WEED CONTROL: Hand weeding will be undertaken to remove weeds surrounding the new planting. An approved herbicide will be used in years 1 to 3 to ensure healthy tree growth and weed free areas

PROTECTION OF PLANTS: All trees will be protected with a solid tubular guard with ratchet ties and secured to a wooden stake. Guards will be 750mm high. All planting is to be fenced out to exclude stock

GROUND PREPARATION AND PLANTING: Pre planting soil preparation will ensure health and success of the planting scheme. A minimum rooting depth of 600mm shall be provided to all tree planting areas including a minimum depth of 400mm top soil

Loosen soil to a depth equivalent to height of the footfall and over a wide area to eliminate compaction
