EXECUTIVE SUMMARY

ERW JOINT COMMITTEE

1 DECEMBER 2017

Estyn Briefing

BRIEF SUMMARY OF PURPOSE OF REPORT

Estyn provided us with 4 recommendations during the inspection of June 2016. These were followed up in November 2017. Our self-evaluation of progress and the Estyn draft judgement as shared with ERW on November 16th 2017 is attached as papers.

The inspection team will not return formally to review progress further. They noted that the two case conferences taking place in the region and the two inspections of LAs during the coming year would allow them to review progress against JC recommendations of September 21 2017.

The full text of the recommendation is likely to feature in the report.

DETAILED REPORT ATTACHED?

YES

IMPLICATIONS

Risk Management Issues

YES

1. Risk Management

The Estyn activity in the region for the coming year means that progress against the JC recommendations of September 21 2017 will need to be sufficient. Failure to secure this progress is therefore a risk.
