ANALYSIS OF COMMENTS - SUMMARY MATRIX TABLE - 2023

- **Table of Qualitative Responses to Licensing Policy Review Consultation 2023**
- This table now considers comments expressed in the survey's free-text questions. Note is made of the respondents ID number (to provide a traceable record), comment(s) received, the Council's response and, where appropriate, changes to the licensing policy as a result of the consultation.

Respondents that have not submitted detailed comments are omitted from the table but are included in the analysis contained in the consultation report.

		The licensing section continue to receive complaints and referrals in relation to licensed premises / alcohol related incidents in this part of Carmarthen. Following the introduction of the CIA in 2018, the licensing section has received enquiries regarding licensing premises within the CIA however the number of premises licences remains static, and no further			
		applications have been received. In one case the operator subsequently licensed a premises in another area of			
		Carmarthen (outside the CIA) , that premises now has the			
		benefit of a licence with permitted hours extending to 3.30am.			
		Officers, whilst conducting evening compliance visits, regularly

As a Town and County Councillor for the area since 2017 I would like to relay the following observation and comment with regards the review of the effectiveness of the existing Cumulative Impact Assessment area in Carmarthen and the possibility of an additional Assessment in the Nott Square, King Street and Queen Street area of town. I think it important for the review to take into account that from my perspective the establishment of the existing CIA in the Lammas Street area has been a great success. Complaints of Anti-social behaviour and alcohol related disturbances, assaults, criminal damage and noise etc have reduced to such an extent that complaints are now few and tend to be associated with gatherings in the vicinity of the late night take away premises. Given the very noticeable difference I would therefore very much support the current arrangements to continue. Unfortunately the same cannot be said of the Notts Square/Queen Street and King Street area which over recent years has become the new "hot spot" area of complaint of rowdiness, noise, and alcohol related violence, criminal damage, public nuisance and littering in town, Most, but not all of the complaints I have received over recent years relate primarily to one particular licensed premises but such a significant number of similar club like premises operating in such a condensed street environment inevitably brings issues of antisocial behaviour, noise and alcohol related issues. The cumulative effect of such a concentration of similar premises within such a small area operating over a similar and relatively short period of time, is, I believe, clear to see and should be able to be evidenced by the various agencies. With that in mind, and given the undoubted success of the existing Impact Assessment area in Lammas Street, I would strongly support the continuation of the existing Assessment Area in Carmarthen and also to establish an additional Culminative Assessment Area. This will be taken into account when reviewing the Policy				·

		The Transforming Tyisha team would support the continuation			
		of the cumulative impact assessment within the Station Road			
		•			
		area of Llanelli. We feel that the implementation of these			
		restrictions falls in line with the aims and objectives set out by			
		the project at it's outset. The Transforming Tyisha Project was			
		established following the completion of a Planning for Real			
		exercise. This exercise allowed members of the community to			
		raise the concerns and issues they felt should be addressed as			
		part of a regeneration project. This exercise presented a			
		number of themes within which the community would seek			
		improvement. These included housing and environmental			
		conditions, community cohesion, crime, disorder and anti-social			
		behaviour. We feel that the implementation of the cumulative			
		impact assessment will ensure proactive steps are being taken			
		for the management of issues relating to waste, noise, crime			
		and anti-social behaviour. The proactive steps to reduce these		This will be taken into account	The Assessment Will
30	35	issues falls in line with the goal of the project as set out.	Noted	when reviewing the Policy	reflect this

		As a licensing section, we continue to receive complaints and			
		referrals regarding alcohol related incidents in this part of			
		Llanelli. I have attached a breakdown of such incidents for			
		reference. Since a CIA has been introduced for this portion of			
		Station Road Llanelli the authority has refused a number of			
		applications for premises licences, with the decisions making			
		reference to the CIA. Those decisions have either not been			
		appealed or in the case of one premises which appealed the			
		decision in 2019, that appeal to the Magistrates Court was not			
		successful. The area is also included within the updated PSPO			
		area for Llanelli. Engagement with Council officers involved with			
		the regeneration of this area of Llanelli highlighted the ongoing			
		challenges with alcohol related issues and confirmed that the		This will be taken into account	The Assessment Will
31	35	existing CIA supports the aims of the regeneration project.	Noted	when reviewing the Policy	reflect this

			T	T	1
		We feel that the operation of these premises for consumption on site intensify the concerns raised throughout this response. These concerns include the large amount of reported anti-social behaviour in the Station Road area. These reports have been received from Dyfed Powys Police, and through our community groups. Due to our operation as a 9-5 service, we are unable to provide any information on incidents experienced by officers, and can only provide information as has been presented by the public and professional bodies. Additional to the above, we have found significant issues in relation to cigarette litter at a number of premises along Station Road. This has an overall effect of detriment to the environmental quality of the area. This litter is largely clustered around the designated smoking area of these licensed premises. As such, the restriction of the premises will ensure the matter of cigarette litter can be		This will be taken into account	The Assessment Will
30	36	targeted and dealt with in an appropriate manner.	Noted	when reviewing the Policy	reflect this

		A number of street drinking incidents have been witnessed by our Community Wardens. This has included groups of adults within the PSPO area drinking alcohol. We feel that the restriction of sale for off premises consumption creates a barrier to this behaviour, that could dissuade those from partaking in consumption of alcohol within the areas immediately around Station Road, Llanelli. In turn this dissuasion should assist in the reduction of associated issues. This includes the substantial issue of littering related to alcohol containers. In restricting the sale of alcohol for off premises restriction, the number of alcohol containers available in the area will reduce, and as such the littering of these containers		This will be taken into account	The Assessment Will

			I	I	
30	38	Our primary concern in relation to the operation of these late night refreshment premises is in relation to the waste issue they create. We continue to witness a large number of take away containers littered along the street and within lanes along Station Road, Llanelli. This has resulted in upwards of 60 street cleanses being requested in the wider area. Further to this, additional collections have been implemented to aid in the management of this waste issue, at a cost to the local authority. We feel that the restriction of these premises will allow the amount of litter created to be controlled in a manner that should help to alleviate these environmental concerns.	Noted	This will be taken into account when reviewing the Policy	The Assessment Will reflect this

	Attached is a summary of current premises licences,			
	applications and licences surrendered since January 2017. The			
	report indicates an increase in licensed premises over the			
	period. There has been an increase in premises operating into			
	the early hours of the morning including one premises which			
	has recently re-opened under a historically granted premises			
	licence and has chosen to operate for 24 hrs a day on occasions.			
	In addition to increased numbers of premises, some existing			
	premises have also increased their capacity and/ or extended			
	their permitted hours. Attached is a report of complaints and			
	referrals logged with the Licensing Section since January 2017.			
	The report shows a substantial increase in the numbers of			
	complaints and referrals during 2022 and 2023. The referrals			
	and complaints relate to various matters, including. •			
	Complaints of noise, both entertainment and people in the			
	street. • Complaints of littering, cigarette litter, broken glass			
	and vomit • Assaults / disorder in the street and within			
	premises • Intoxicate persons in the street/ doorways / refusing			
	to leave premises. • Allegations of drug dealing in the street.			
	The complaint and referral report data attached shows a			
	substantial increase over the reporting period which may, in			
	some part, be as a result in the difficulty with accessing older			
	manual records in comparison with the current electronic			
	recording. When conducting out of hours licensing visits and			
	monitoring in Carmarthen Town centre officers have noted that			
	on occasion large numbers of persons are congregating in the			
	square in the early hours of the morning. It is difficult to identify			
	/ allocate the individuals as customers of one individual			
	premises in the Square. Some of those congregating in the area			
	may not have entered a licensed premises and may be passing			
	though the location. Several of the licensed premises in this			
	area do not have their own outdoor areas where customers can			
	smoke. Customers wishing to smoke have to exit the premises			
	to do so in the street. Examples of this congregation of persons		This will be taken into account	The Assessment Will
71	in the street have been captured on officer's body worn video.	Noted	when reviewing the Policy	reflect this

		Officers have also witnessed violent incidents taking place in the square and on one occasion called for Police attendance at the location due to a large scale disorder. Officers have also witnessed young persons throwing glass vessels at each other in the square. Not all incidents that occur in this area are formally reported, during evening compliance visits Officers have witnessed a person who had significant injuries as a result of			
		being assaulted whilst in this part of Carmarthen, leaving the area without reporting the incident to the Police – the incident has not then been captured in Police incident lists which are			
		regularly exchanged with the authority.

8	73	Late night selling	Noted	This will be taken into account when reviewing the Policy	The Assessment Will reflect this
9	73	The clubs on Queen Street need to have respect for local residents.	Noted	This will be taken into account when reviewing the Policy	No change necessary
10	73	There are a lot of residential flats and one house on Queen Street. It is important to consider the impact on these residents.	Noted	This will be taken into account when reviewing the Policy	The Assessment Will reflect this

11	73	High concentration of clusters of worse-for wear people with the potential for anti-social behaviour/criminal damage. the longer they're hanging around the higher the likelihood of urine and vomit deposits	Noted	This will be taken into account when reviewing the Policy	The Assessment Will reflect this
24	73	as previous answer	Noted	This will be taken into account when reviewing the Policy	The Assessment Will reflect this
29	73	Street noises (extremely loud music, shouting and conversations of group of people) were experienced by residents in Queen Street until 6:00/7:00am. Building vibrations which shook doors/doorframes and roof trusses in Queen Street Apartments were felt by tenants. (Queen Street Apartments have soundproofed walls which meet UK regulations.) Amidst formal complaints to Environmental Health and report to the Trading Standards by Police, the nightclub owners did not take any steps in managing these issues. In fact, they are a big source of the problems.	Noted	This will be taken into account when reviewing the Policy	The Assessment Will reflect this
31	73	see above (Q71)	Noted	This will be taken into account when reviewing the Policy	The Assessment Will reflect this
33	73	See below (Q73)	Noted	This will be taken into account when reviewing the Policy	The Assessment Will reflect this

		As a Town and County Councillor for the area since 2017 I			
		would like to relay the following observation and comment with			
		regards the review of the effectiveness of the existing			
		Cumulative Impact Assessment area in Carmarthen and the			
		possibility of an additional Assessment in the Nott Square, King			
		Street and Queen Street area of town. I think it important for			
		the review to take into account that from my perspective the			
		establishment of the existing CIA in the Lammas Street area has			
		been a great success. Complaints of Anti-social behaviour and			
		alcohol related disturbances, assaults, criminal damage and			
		noise etc have reduced to such an extent that complaints are			
		now few and tend to be associated with gatherings in the			
		vicinity of the late night take away premises. Given the very			
		noticeable difference I would therefore very much support the			
		current arrangements to continue. Unfortunately the same			
		cannot be said of the Notts Square/Queen Street and King			
		Street area which over recent years has become the new "hot			
		spot" area of complaint of rowdiness, noise, and alcohol related			
		violence, criminal damage, public nuisance and littering in town,			
		Most, but not all of the complaints I have received over recent			
		years relate primarily to one particular licensed premises but			
		such a significant number of similar club like premises operating			
		in such a condensed street environment inevitably brings issues			
		of antisocial behaviour, noise and alcohol related issues. The			
		cumulative effect of such a concentration of similar premises			
		within such a small area operating over a similar and relatively			
		short period of time, is, I believe, clear to see and should be			
		able to be evidenced by the various agencies. With that in mind,			
		and given the undoubted success of the existing Impact			This supports the
		Assessment area in Lammas Street, I would strongly support the			introduction of the
		continuation of the existing Assessment Area in Carmarthen			CIA for Nott Square,
		and also to establish an additional Culminative Assessment Area		This will be taken into account	Queen Street and

		The Safer Communities Partnership is working closely with the			
		police due to concerns about alcohol-related crime and ASB in			
		an area of Llanelli Town Centre, which includes Station Road,			
		and are currently looking to introduce a new Public Spaces			
		Protection Order. The Safer Communities Partnership would			
		therefore support any possible interventions to prevent both			
		cumulative impact in this area and it continuing to be a hotspot			
		area. The current and proposed Public Spaces Protection Order			
		in Llanelli Town Centre which aims to tackle alcohol related		This supports the retention of	The Assessment Will
28	75	crime and disorder	Noted	the CIA in Station Road	reflect this
		A. The relevant Council departments and other authorities			
		NEED to talk with each other and work with each other in a			
		holistic manner. For example, Licensing must not issue any			
		licenses (or extend/enhance existing licenses) more than the Environmental Health can monitor as well as more than the			
		Police can respond. Coordination between the relevant			
		authorities, in relation to Queen Street problems, was observed		The Licensing Authority works	
		to be almost nil. If you check the Council/Police record, I have		closely with the Police and	
		expressed this in many of my communications with the relevant		other responsible authorities	
		authorities. Most of the time, we only received promises (with		when investigating complaints	
		no actions) and empty assurances. In short, only words. I feel		relating to licensed premises.	
		that the problems in Queen Street were not responded		This includes undertaking late	
		fairly/adequately/appropriately because short-term economic		night visits and monitoring.	
		benefits were the main focus by the Council. While it is true		Where evidence of licence	
		that nightclubs/bars bring in money to the town, it has been		offences is found, enforcement	
		neglected (or ignored) that nightclubs attract hooligans to		action is taken. The Licensing	
		Carmarthen (either as visitors or residents). In the long run,		Authority cannot limit the	
		Carmarthen could become an unattractive town to decent		duration of premises licences as	No change to the
29	75	investors/businesses/residents. If the Council continues to think	Noted	this is set out in the legislation.	policy required

	76	this way, I could only see Carmarthen's downfall in the future. I appeal to the Council to change its vision/thinking/approach/behaviour and to consider a long-term positive progress for Carmarthen. Formulate policies but please DO enforce policies/controls; please don't be deaf to complaints due to short-term and short-sighted economic benefits that nightclubs/bars bring. Having said the above, I want to clarify that I am NOT against pubs/nightclubs/bars. Rather, I am pointing out that I would like to see effective and prompt enforcement of policies/regulations that make all businesses (including nightclubs/bars/pubs) and residents coexist harmoniously - an environment that is sensitive/considerate to others. Relative to Queen Street, if: 1. the noises were controlled from 23:00 to 07:00, it would have been a good compromise between businesses and residents. 2. mechanism were put in place regarding rubbish (vomit/broken glass/urine/other litter), it would not have been a problem having businesses selling alcohol in the area. B. It is mindblowing that there are licenses that do not have expiry dates. Hence, in cases were the Environmental Health and/or the Police are not fulfilling their duties adequately and appropriately, it is extremely difficult to steer a nuisance case towards a fair and just result. Perhaps Licensing could offer applications with a choice of durations (e.g., 2/5/7 years) to be selected by applicants and licenses can only be renewed subject to regular assessments (complaints received, visits by food hygiene, crime reports, etc) during the selected duration. I believe these are logical and very sensible suggestions. Please give us the reasons and provide evidence below:
